

Login to IBM Cloud

The login page features a large blue rectangle on the left containing a white cloud icon with a network diagram below it. On the right, the IBM Cloud logo is displayed above a welcome message. Two buttons, 'Create a free account' and 'Log in', are provided. Below these are links for 'Pricing', 'Catalog', 'Docs', and 'Support'. Social media icons for Facebook, Twitter, YouTube, and LinkedIn are shown under the heading 'Follow us on'. A copyright notice for IBM Corp. 2014, 2017 is at the bottom.

 **IBM Cloud**

The dashboard has a dark header with 'Docs', '244 Trial Days Remaining', user information, and location. The main content area has a light blue background with a central 'Dashboard' title and a grid icon. A message prompts the user to explore offerings, with a corresponding button. Three cards at the bottom provide quick-start options for Cloud Foundry, containers, and Bare Metal Servers.

Dashboard

We noticed you don't have anything on your platform yet, get started with one of the options below, or go to the catalog to create a new application or service.

[Explore our Offerings](#)

Create a Cloud Foundry app

Go straight to developing with a Liberty for Java runtime, then add some of our 100+ services to build your app even faster.

Deploy apps in containers

Create a Kubernetes cluster and run highly available containers. A Kubernetes cluster lets you quickly automate, update, and scale containerized apps.

Order a monthly Bare Metal Server

Built to spec with 500GB/month outbound bandwidth included, ready in 2-4 hours.

From Dashboard go to Catalog

The screenshot displays the IBM Cloud Catalog interface. At the top, a dark blue header bar contains the 'Docs' link, a trial status indicator ('244 Trial Days Remaining'), the user's account information ('sebastien gautier's Accou...'), location ('Germany'), email ('sebastien.gautier@fr.ibm.com'), and role ('devde'). Below the header, a navigation bar includes a hamburger menu, the 'IBM Cloud Catalog' logo, and links for 'Catalog', 'Support', and 'Manage'.

The main content area is divided into two sections. On the left is a sidebar with a search bar and a list of categories under 'All Categories'. The categories are grouped into 'Infrastructure' (Compute, Storage, Network, Security, Containers, VMware) and 'Platform' (Boilerplates, APIs, Application Services, Blockchain, Cloud Foundry Apps, Data & Analytics, DevOps, Finance, Functions, Integrate, Internet of Things, Mobile, Security, Watson). The right section features a search bar and a 'Filter' button. Below this, the 'Infrastructure' section is highlighted, showing 'Compute' services. Under 'Compute', there are two offerings: 'Bare Metal Server' and 'Virtual Server', both provided by IBM. Below the 'Compute' section, the 'Storage' section is highlighted, showing three offerings: 'Block Storage', 'Content Delivery Network', and 'File Storage', all provided by IBM. The 'Object Storage' offering is also visible, provided by both 'Life' and 'IBM'.

Tone Analyzer

People show various tones, such as joy, sadness, anger, and agreeableness, in daily communications. Such tones can impact the effectiveness of communication in different contexts. Tone Analyzer leverages cognitive linguistic analysis to identify a variety of tones at both the sentence and document level. This insight can then used to refine and improve communications. It detects three types of tones, including emotion (anger, disgust, fear, joy and sadness), social propensities (openness, conscientiousness, extroversion, agreeableness, and emotional range), and language styles (analytical, confident and tentative) from text.

Natural Language Understanding

Analyze text to extract meta-data from content such as concepts, entities, keywords, categories, sentiment, emotion, relations, semantic roles, using natural language understanding. With custom annotation models developed using Watson Knowledge Studio, identify industry/domain specific entities and relations in unstructured text.

Discovery

Add a cognitive search and content analytics engine to applications to identify patterns, trends and actionable insights that drive better decision-making. Securely unify structured and unstructured data with pre-enriched content, and use a simplified query language to eliminate the need for manual filtering of results.

Launch Discovery Tools.

The screenshot shows the IBM Cloud Watson Discovery console. The top navigation bar includes 'Docs', '244 Trial Days Remaining', the user 'sebastien gautier's Accou...', 'United Kingdom', 'sebastien.gautier@fr.ibm.com', and a 'devuk' region indicator. The main header features the IBM Cloud Watson logo and links for 'Catalog', 'Support', and 'Manage'. A left sidebar contains a 'Manage' section with sub-links: 'Getting started', 'Service credentials', 'Plan', and 'Connections'. The main content area is titled 'Watson / dsc0' and features a 'Discovery' section with a purple icon and the text: 'Add a cognitive search and content analytics engine to applications to identify patterns, trends and actionable insights that drive better decision-making'. To the right of this text is a 'Launch tool' button. Below this is a 'Developer resources:' section with links for 'Getting started tutorial' and 'Demo'. At the bottom, there is a 'Discovery tooling' section with a description: 'Visually configure your service. Upload, convert, normalize and enrich sample content and then use that configuration to ingest and...' and another 'Launch tool' button.
